

Announcing a product name change

Dear customers,

As of 29 April 2019, SILON, the leading producer of polyolefin-based performance compounds, is changing the name of its TABOREX for cables product line to TABOCAB.

The TABOCAB portfolio covers compounds, masterbatches and Silane crosslinking cocktails of the brand SILMIX. With this change we decided to change the code names for TABOCAB compounds and masterbatches. See the conversion table below for a product overview.

The name TABOREX will be retained for compounds for other segments.

We hope that the new product name will make finding your way around our product portfolio easier.

Should you require any additional information, please do not hesitate to contact us.

Best regards,

Vojtěch Hrubý
Head of Sales

Petr Ličko
Head of R&D
